

Re-starting a Significant Past Producer in a Historic Mining Camp

- **Fully Permitted** Patented ground and signed EPA Agreement.
- **Historic SEC Proven & Probable Reserves and Resources*** 9.1M tons @ 5.08% Zn, 2.35% Pb, 1.29 opt Ag.
- **Past Producer – Proven Metallurgy** The Bunker Hill Mine produced over 35M tons of ore grading 8.76% lead, 3.67% zinc, and 155 g/t silver. Zinc and lead concentrates are very clean with no deleterious elements.
- **Developed** Near term access to +7 years of mineable material at 1,500 tpd.*
- **High grade zones** > 20% combined Pb/Zn.
- **Experienced Management** operated the nearby Galena Mine.
- **Excellent Infrastructure/Geopolitical Risk** paved road access, low cost power, water, skilled labour, mining services, Idaho is mining friendly and a “Right to Work” state.
- **Exploration Potential** 3,400 DD holes show numerous high-grade intercepts.

Environmental Protection Agency – EPA

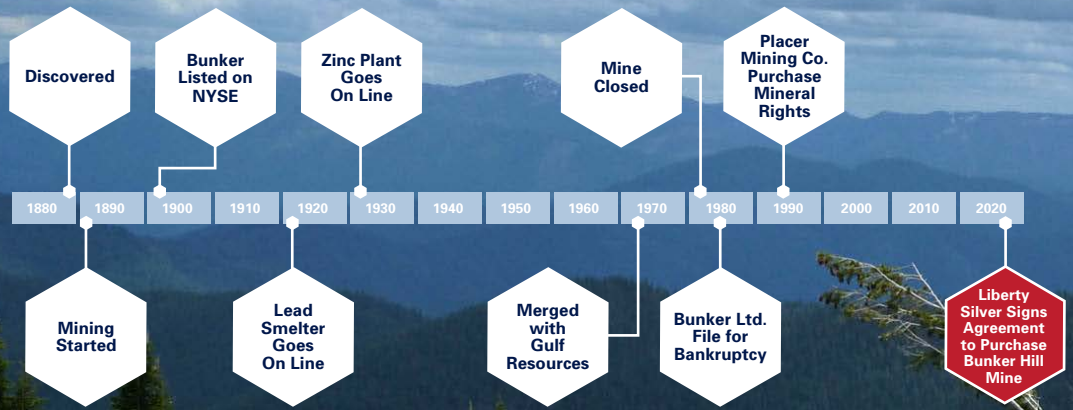

The general tone of advanced negotiations with the EPA is exceedingly positive and cooperative.

March 7, 2018 – EPA signed agreement with Bunker Hill Mining Corp. which provides full rights of operatorship of The Bunker Hill Zinc, Lead, Silver Mine.

The Bunker Hill Mine

Quill Zone High Grade and Ready to Go

- Priority target.
- Quill Zone High Grade and already developed.
- Reserve of nearly 4.9 M Proven and Probable tons between 9 level and 14 level, readily accessible for near term mining at initial 1500 T/d.*
- There has been previous mining done on all five levels with nearly 500,000 tons of high grade zinc ore recovered in late 1970's.
- The zone is known to continue from historical drilling at depths above the 2nd level to below the 22nd level, a vertical height of over 4,000 feet.

* Reserves or Proven and Probable tons are SEC Compliant but are not to be considered 43-101 Compliant
